

# Launch Readiness Checklist

A final evidence pass before a GCC platform is placed in front of real users.

## Product

- ☐ The primary journey works in English and Arabic at target breakpoints.
- ☐ Errors, empty states, confirmations, and recovery paths are clear.
- ☐ Performance, accessibility, security, and privacy checks are recorded.

## Operations

- ☐ Support ownership, response times, and escalation paths are confirmed.
- ☐ Payments, email, analytics, backups, and monitoring are configured.
- ☐ Legal copy reflects the actual vendors and data handling model.

## Decision

- ☐ Launch criteria and rollback conditions are explicit.
- ☐ The first review date and evidence dashboard are scheduled.
- ☐ Known limitations are visible to the people accountable for the release.
