

# Platform Scope Brief

A one-page boundary for turning validated demand into the smallest credible platform.

## Outcome

- ☐ State the user outcome the first release must enable.
- ☐ Name the one behaviour that proves the release is useful.
- ☐ Define the business decision this release must inform.

## In scope

- ☐ List only flows required to complete the core outcome end to end.
- ☐ Include Arabic, accessibility, security, and operational needs from day one.
- ☐ Record integrations and data dependencies with named owners.

## Boundaries

- ☐ List tempting features that are explicitly deferred.
- ☐ Document launch risks, assumptions, and acceptance evidence.
- ☐ Agree who approves scope changes and what evidence justifies them.
